Weekly Coal Production

Production for Week Ended:
June 18, 1988

Preface

The *Weekly Coal Production (WCP)* provides weekly production estimates of U.S. coal by State, as well as supplementary data which are published twice a month. Supplement 1 usually includes monthly statistics on U.S. coal production and aggregated annual historical data on coal supply and demand, consumption, stocks, imports, and exports. Supplement 2 usually contains monthly data covering electric utility coal consumption, stocks, and receipts; and coal imports and exports.

This publication is prepared by the Coal Division; Office of Coal, Nuclear, Electric and Alternate Fuels; Energy Information Administration (EIA) to fulfill its

data collection and dissemination responsibilities as specified in the Federal Energy Administration Act of 1974 (P.L. 93-275) as amended. *Weekly Coal Production* is intended for use by industry, press, State and local governments, and consumers. Other publications that may be of interest are the quarterly *Coal Distribution Report*, the *Quarterly Coal Report*, *Coal Production 1986*, and *Coal Data: A Reference*.

This publication was prepared by John Moens under the direction of Noel C. Balthasar, Chief, Data Systems Branch. *Questions on energy statistics should be directed to the National Energy Information Center (NEIC) at (202)586-8800.*

Important Notice

As required by Federal Government regulation, the Energy Information Administration (EIA) is conducting a review of its publications mailing list. If you are on the EIA mailing list, you will receive a renewal notice, which must be filled out and returned to us. If we do not receive a response by August 31, 1988, your name will be removed from the EIA mailing list. If you have any questions, you may call the National Energy Information Center at 202/586-8800.

Summary

U.S. coal production in the week ended June 18, 1988, as estimated by the Energy Information Administration, totaled 17.9 million short tons. This was 0.8 percent higher than production in both the previous week and in the the corresponding week of 1987.

This report contains additional data on electric utility coal receipts, stocks and consumption, as well as on U.S. coal and coke exports and imports for March and April 1988. Some of the highlights of those data are summarized here.

For the first four months of 1988, coal consumption at electric utilities totaled 241.6 million short tons, 8.7 percent higher than in the same period of 1987. Stocks of utility coal at the end of April 1988 were virtually the same as those a year earlier. Receipts of utility coal totaled 58.8 million short tons in March 1988, 4.0 percent higher than in February. The price of coal delivered to electric utilities in March 1988 averaged 149.4 cents per million Btu, 0.4 percent more than in February.

U.S. coal exports from January through April 1988 totaled 25.0 million short tons, 9.6 percent more than in the same period of 1987. The price of coal exports averaged \$42.19 per short ton, \$2.45 per ton (5.5 percent) less than in the comparable period of 1987. The

three principal destinations among the 38 countries that received U.S. coal in the first four months of 1987 were Japan (5.4 million short tons), Italy (3.5 million short tons), and Belgium and Luxembourg (2.0 million short tons). Together, they accounted for 43.4 percent of the total.

U.S. coal imports from January through April 1988 totaled 648,783 short tons, 15.8 percent higher than the amount imported in the comparable period of 1987. Coal was imported at an average price of \$28.66 per short ton, a drop from \$33.29 per short ton in the first four months of 1987. The chief sources of imported coal were Colombia (47.3 percent) and Canada (38.0 percent).

U.S. coke exports from January through April 1988 amounted to 196,522 short tons, 1.0 percent more than a year earlier. The price averaged \$83.32 per short ton as compared with \$88.43 per short ton in the same period of 1987. Canada and the Philippines were the chief destinations. U.S. coke imports from January through April totaled 796,081 short tons, more than five times the tonnage received in the same period of 1987. Averaging \$69.85 per short ton, the price was 42.7 percent higher than in the January through April period of 1987. Most of the coke was imported from Japan (41.6 percent) and Australia (33.6 percent).

AFTER THE DECLARATION OF INDEPENDENCE OUR FOUNDING FATHERS WROTE SOMETHING EVEN MORE IMPORTANT.

Ten years after the signing of the Declaration of Independence our founding fathers created what historians have called the greatest single document struck off by the hand and mind of man.

Our founding fathers created the Constitution of the United States.

For the first time in history, power was granted by the people to the government, and not by the government to the people.

The freedom unleashed by the Constitution allowed Americans to develop their talents and abilities to the fullest. And attain what is now known the world over as the *American Dream*.

As we commemorate the Bicentennial of the Constitution, there is no better way for you as an American to reaffirm the principles for which our country stands than to learn more about the Constitution.

The words we live by.

THE CONSTITUTION
